Presenting **App-XS** which is…

a complete, easiest and most cost effective Server Based Computing solution and web enablement of Desktop based applications

- Access data from any device anywhere
- Enables Multi-sessions, Load Balancing & Universal Printer
- Seamless Remote Application and Application Control
- Centrally maintained and updated, while the data remains safe on the server
- An opportunity to reach new levels of mobility and convenience
- Is a secure-by-design layer to strengthen data and information security
- Is easy to install and implement, and it has outstanding performance

BENEFITS

With App-XS, you can access all the information on all of your applicants whenever, wherever and however you need. No need to carry around bulky hard drives or paper files. With just a phone, iPad or laptop you can have direct and immediate access to all the information you need.

Sharing information with colleagues, employees and clients at home, on the road, or on the other side of the world, is now a necessity & which is an inbuild feature of App-XS.

It secures your data such that only authorized personnel can access the information securely and privately from anywhere in the world.

The best part about App-XS is that data storage and access is most reliable, secure and a great way to enable cooperation within your team. Everyone will always be up-to-date and will always have access to the most recent data.

App-XS

Remote Access, Requirements, Printing, Protocol, ease of use and efficiency let it be any thing App-XS overshadows any application Globally

Developed & Designed by TechnoXprt Solutions
